

Lantern Ideas

These are from previous years Lantern Walks at Madrone Trail.

From left:

- Papier-Mache: Blow up a balloon and then cover it with layers of tissue paper dipped in watered down glue. Will take several layers to be sturdy. After it dries, pop the balloon and add a handle (can be wire, string, finger knitting, etc)
- Glass Jar: Cover a glass jar with layers of tissue paper. Use the ring of the jar to attach a handle.
- Clean out any used can and take label off. Punch holes using a large nail and hammer. Holes can be punched in design of choice or random. Attach handle through holes.
- Use card stock and first paint a large narrow rectangle. Then cut out shapes with scissors or a hole punch. Glue tissue paper to the holes to create a stained glass effect. Create several creases for edges, fold, and glue shut. Cut out another piece of card stock for the bottom and attach. Add handle.
